

# Supervisor Meeting

17 November 2020

**Time:** 1300

**Location:** MS Teams

**Attendees:** Ed Daly, Darragh, Anthony, Michael, Damien

**Introduction** We met today to discuss our progress so far in the project with Ed. We had previously passed on a video of the prototype running and the graphed data we created from the image captures. Ed gave us some more solid information on the medical end of things.

## From Us

- Sent video demo.
- Sent report with graphed data.

## From Ed

- Ed was in contact with a company in Australia, Eye Guide, who said that we are following the same path they did when developing similar software recently.
- He informed us of HIA protocols in regard to World Rugby.
- We discussed the gathering of data. Where we might get it from and at what point in a season is the best time to capture the base line test image.
- Ed may be able to get us in with a team to test our application.
