

Supervisor Meeting

16 October 2020

Time: 1400

Location: MS Teams

Attendees: Darragh, Anthony, Michael, Damien

Introduction Due to unforeseen circumstances, Damien was unable to join us today. We emailed our progress to him. See below

Hi Damien,

Sorry you couldn't make the meeting; I am assuming that Teams sent a meeting request but just as a backup we will email you separately too in the future, assumptions been the 'Mother of all-up's'. Below is a list of points and activities we were going to bring up.

7. Working with EMGU.CV to detect an eye - doing this to have some form of authentication when using the app. Rather than the app been tricked into thinking it is recording an eye.
 8. Database Design - as it stands, we are using Mongo DB.
 9. We have set up an AWS account so we can host the database.
 10. We are working on having a rudimentary UI, which will have the dot moving in a figure of eight.
 11. We are about to start logging all meetings on GitHub Wiki.
 12. We want to send a survey to Ed, so he can send it out to his students. The survey is part of our research. It is in regards to the standard mobile phone specifications.
- If you have any questions/comments or suggestions, please let us know.

Thanks, have a good weekend,

Darragh and the lads.
