

# Supervisor Meeting

03 November 2020

**Time:** 1300

**Location:** MS Teams

**Attendees:** Darragh, Anthony, Michael, Damien

**Introduction** Todays meeting was short. We have had a lot of work on with other assignments over the last few days so we took a step back from this project.

## **From Us**

- Michael has sent over a video demoing our application, which is printing X,Y coordinates to the screen, to Damien to show our progress to date.
- We are working on creating a table for us to use to measure conditions during testing of the tracking software

## **From Damien**

- Damien gave us a small break on the fact it was a slow week, only in terms of our progress so far in the project.
- He has asked for a timeline to be mocked up. This is to include items from the projects approval until the presentation we are due to give in or around the 14th December.
- We are encouraged to compile a list of questions for Ed Daly, with whom we will be meeting in the coming weeks to present our progress.
